THE FOOT SWITCH EXPERTS®

## Product Information Sheet

### RFT1 Wireless TIG Welding Foot Control

The RFT1 incorporates all of the benefits of the industry choice SSC TIG Foot Control, and cuts the cord to make your life easier. The SSC RFT1 is the first wireless pedal with steel construction and an aluminum handle for easy mobility. Plus, it's universal, which means that with the proper plug, it will work with almost any welder produced in the last 35 years. And it still incorporates SSC's patented design which improves low-current welding while providing precision arc control.

#### Setup and instructions:

1. Attach the handle as shown in the picture below using the included hardware.
  2. Charging: The RFT1 should last about 24 weeks in a one-shift production environment before it needs charging. Of course, this will vary based on usage. When the battery is low, the battery light on the receiver will change from green, to amber, and then red to let you know its status. To charge, untie the charging cable tucked next to the plastic transmitter box on the pedal, and plug it into your phone charger (you might need an extension cord). When finished, replace the dust cap and return it to its spot next to the plastic transmitter box in order to protect it from being caught under the pedal.
  3. Plug the receiver into a wall socket, either on your machine or using an extension cord. Then attach the plug to your welder's remote connection.
- Patented design is tested to one million lifecycles.
  - Designed and manufactured under a quality system certified to ISO 9001 requirements.
  - 1-year warranty on parts and labor.

**Dimensions, L x W x H, in. (cm.):**

12 x 6.87 x 4.2 (30.5 x 17.5 x 10.7)

25.5 in. (64.8) height with handle

**Weight, pounds (kg.):** 10 (4.5)

**US Patent:** 5,535,642

**Finish:** powder paint, black
